hereby request for issuance of Biosafety Permit for Direct Use for the genetically modified (GM) plant/plant product described below.

Designation	Regulated Article	Donor Organism	Host Organism	Vector or Vector Agent	Constituents of the Regulated Article
Common Name	Stacked Trait Product NK603 × T25 and all progenies derived from crosses of the product with any conventionally-	NK603: Common soil bacterium T25: Common soil bacterium	Maize (corn)	NK603 was produced by particle acceleration using a linear DNA restriction fragment from the vector PV-ZMGT32.	Molecular studies demonstrated that maize line NK603 contains a single copy of introduced DNA at a single locus. The insert

Designation	Regulated Article	Donor Organism	Host Organism	Vector or Vector Agent	Constituents of the Regulated Article
	bred maize, and maize-containing registered biotech events.			T25 was produced via polyethylene glycol mediated protoplast transformation system using vector pUC/Ac.	contains two expression cassettes, each containing a single copy of the cp4 epsps gene. Molecular analysis demonstrated that T25 contains a single copy of the P35S-pat-T35S expression cassette containing pat gene.
Scientific Name	Zea mays L.	NK603: Agrobacterium sp. strain CP4 T25: Streptomyces viridochromo genes	Zea mays L.		
Trade Name	Roundup Ready® Corn 2/LibertyLink Corn				
Other Designations		-		•	

Country of Origin	NK603 × T25 was originally developed and deregulated in U.S.* (* U.S. does not regulate a breeding stack of deregulated single events.)	
Quantity	Importers of commodities/grains will have to provide the quantities they need to import.	
Flight/Voyage No	Importers of commodities/grains will have to provide the flight/voyage no.	
Port of Entry	Importers of commodities/grains will have to provide the port of entry.	
Proposed Schedule	Importers of commodities/grains will have to provide the schedule of importatio	

*The following supporting documents are attached

- 1.In the case of imported regulated article, notification from the exporter or country of origin in accordance with existing international agreements on the transboundary movement of genetically modified organisms;
- 2. Information on socio-economic, cultural and ethical considerations;
- Copy of the proposed PIS for Direct Use, (Annex "F") including information required for evaluation of environmental and health impacts;
- In cases of renewal, certified true copy of expired Biosafety Permit for Direct Use issued by BPI; and
- 5. Proof of payment of fees
- 6.To facilitate review of the application, the applicant may submit documents to show that the regulated article is allowed for commercial distribution as food and feed by the regulatory authorities in the country of origin; and poses no greater risks to biodiversity, and human and animal health than its conventional counterpart. If the regulated article is intended for use as feed or for processing into feeds, the applicant may submit documents to show that the regulatory authorities in the country of origin have likewise determined that the regulated article poses no greater risks to biodiversity, and human and animal health than its conventional counterpart.

The undersigned certifies that based on his/her personal knowledge and/or authentic documents: (i) all the information in this application are true and correct; and (ii) this application contains all information and views on which to base a decision and includes relevant data and information known to the applicant which are unfavorable to the application. The undersigned likewise warrants that the Regulated Article is to be imported solely and exclusively for direct use as food and feed or for processing.
