**Biosafety Permit for Direct Use as Food and Feed,
or for Processing
Number 23-003FFP**

Corn MON 95275 owned and licensed by Bayer CropScience, Inc., with office address at 8th Floor Science Hub Tower, 1 Campus Avenue corner Turin St. McKinley Hill Cyberpark, Pinagsama, Taguig City, Philippines, has satisfactorily undergone biosafety assessment for direct use as food, feed, or for processing (FFP) pursuant to the DOST-DA-DENR-DOH-DILG Joint Department Circular (JDC) No. 1, Series of 2021. It has been found to be as safe as conventional corn and can be a substitute for its traditional counterpart as food, feed, or for processing. Further, the permittee has satisfactorily complied with all the requirements for the issuance of biosafety permit for direct use. This permit is hereby issued for the direct use as FFP of the said regulated article.

The Biosafety Permit for Direct Use shall not excuse the permittee from complying with relevant regulations of other government agencies.

Issued on October 27, 2023 at the Bureau of Plant Industry, San Andres St., Malate, Manila subject to conditions stated at the back of this permit. This permit shall remain valid until revoked for any reasons set forth under Section 18.J. Revocation of Biosafety Permit for Direct Use.

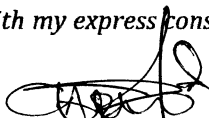

GERALD GLENN F. PANGANIBAN, PhD
Director
Bureau of Plant Industry

Biosafety Permit Conditions

1. The regulated article shall be imported solely and exclusively for direct use as food and feed, or for processing and not for field trial or commercial propagation;
2. The permit holder shall conduct awareness seminars or trainings for importers, and handlers of GM crops, every two years, regarding management or mitigation of the unintended release of the GM commodity shipment during loading, transport, and storage. For the conduct of such activity, a report shall be submitted to the BPI at the end of the second year;
3. The permit holder shall provide reference materials (positive and negative controls) of the transformation event for laboratory analysis to monitor compliance;
4. BPI Biotech personnel, Plant Quarantine Officer and/or his/her duly authorized representatives shall be allowed to access the facility where the regulated article is located, as well as the relevant documents on importation of the regulated article;
5. In case of accidental release of viable regulated materials of corn MON 95275, such as road spill during transport, Bayer CropScience, Inc. shall assist the importers in the management of GM commodities; and
6. In the event that new information becomes available indicating that the regulated article could pose greater risks to human health and the environment as compared to its conventional counterpart, the permit holder shall:
 - a. Immediately notify the Director of the BPI through official communication; and
 - b. Immediately take measures necessary to protect human and animal health, and the environment.

Violation of any condition can lead to revocation of this permit as stated in the DOST-DA-DENR-DOH-DILG Joint Department Circular No.1, Series of 2021 Article VII, Section 18J. If the new information is relevant and significant, the risk assessment shall be readdressed to determine whether the risk has changed or whether there is a need to amend the risk management strategies accordingly.

I have read and understood the Terms and Conditions herein set forth and I enter in this agreement voluntarily and with my express consent, I have unto affix my signature with full knowledge of its legal effect.
